

2015-08-21

To: Ramin Assadi

Employment certificate

Ramin Assadi has been employed at Sectra Imaging IT Solutions AB from June 15th 2015 to August 21st 2015 as a Software engineer. He has worked in the Imaging IT Solutions Product Development division where we develop and maintain software for image handling at radiology departments.

Ramin has been working in a scrum team developing software on the C#/.Net platform. The team has added new functionality to the diagnostic workstation both on the client and server side of the application, which will be used on live systems (read hospitals). The work spanned over several areas but with a main focus on new features for the in-app chat functionality.

Ramin has a strong team spirit his outgoing personality rubs off on the team. Ramin is very driven, always contributing and is keen to get things done and go to the bottom of issues.

Ramin has my best recommendations.

Kind regards

Björn Manholm

Group Manager at Sectra Imaging IT Solutions Product Development
